

ADAM MUHAMMAD

SOFTWARE ENGINEER | FULL STACK DEVELOPER (ANGULAR + .NET CORE) | FRONTEND ENGINEER

Chennai (East Tambaram), Tamil Nadu, India | adam.dev.ai7@gmail.com | +91-883-893-6104
LinkedIn: <http://www.linkedin.com/in/adam-muhammad-6187602a0> | GitHub: <https://github.com/Adam-AI7>
Portfolio: <https://adam-pro-ai7.github.io/adam-portfolio/>

PROFESSIONAL SUMMARY

Software Engineer with **5 years of experience** designing and delivering scalable, real-time enterprise web applications across procurement and IoT domains. Specialized in **Angular (versions 8 through 20)**, **TypeScript**, **RxJS** and standalone component architecture, with hands-on full stack delivery using **.NET Core** and **C#** REST APIs. Experienced in state management (**NGXS**, **NgRx**), real-time data streaming over **WebSocket** and **MQTT**, single page application (SPA) performance optimization, **JWT authentication**, and **CI/CD** (continuous integration and continuous delivery) automation with **Jenkins**. Applies **AI-assisted development** workflows — **Claude Code**, **Model Context Protocol (MCP)** servers, custom agent skills and **prompt engineering** — to accelerate delivery and standardize code quality. Delivers production software in **Agile/Scrum** teams across the full software development life cycle (SDLC).

TECHNICAL SKILLS

Frontend Development: Angular 8 to Angular 20, TypeScript, JavaScript (ES6+), RxJS, HTML5, CSS3, Angular Material, Bootstrap, Responsive Web Design, Standalone Components, Micro Frontend Architecture, Single Page Applications (SPA), Component-Based Architecture, Reactive Forms, Angular Router

State Management: NGXS, NgRx, Redux Pattern, Observables, Selectors, Effects

Backend & APIs: .NET Core, C#, RESTful Web API Development, REST APIs, Angular HttpClient, AJAX, WebSocket, MQTT, JSON, HTTP Interceptors, Centralized Error Handling, Retry Logic

Security & Authentication: JWT (JSON Web Token) Authentication, OAuth 2.0, SAML 2.0, Single Sign-On (SSO), Role-Based Access Control

Testing & Quality: Unit Testing, Jasmine, Karma, Code Coverage, Debugging

AI-Assisted Development: Claude Code, Model Context Protocol (MCP), Custom Agent Skills, Prompt Engineering, AI-Assisted Code Generation and Refactoring, AI-Generated Unit Tests, Agentic Workflow Automation, LLM-Based Developer Tooling

Build, DevOps & Version Control: Angular CLI, Webpack, npm, Code Splitting, Bundle Optimization, Jenkins, CI/CD Pipelines, Automated Build and Deployment, Git, GitHub, Feature Branching, Pull Requests, Code Reviews

Performance Engineering: Lazy Loading, Route-Based Code Splitting, Change Detection Optimization, Memory Optimization, Load Time Reduction

Methodologies: Agile, Scrum, Sprint Planning, Daily Stand-ups, Sprint Retrospectives, SDLC, Requirement Analysis, Cross-Functional Collaboration

Domain Experience: Procurement Automation (RFQ, RFT, Purchase Orders, Online Bidding, Supplier Management), IoT Telemetry, Fleet Management, Real-Time Monitoring Dashboards, Threshold-Based Alerting

PROFESSIONAL EXPERIENCE

Krya Solutions Pvt Ltd

Chennai, India | 02/2025 – Present

Software Engineer

Procurement Management Platform — Angular 17+, .NET Core, NGXS, RxJS

- Architected a standalone, feature-based Angular 17+ procurement application covering Supplier Management, RFQ, RFT, Purchase Order and Online Bidding workflows for enterprise users.
- Integrated .NET Core REST APIs through Angular HttpClient with HTTP interceptors, centralized error handling and retry logic, improving data reliability and request resilience.
- Engineered data-driven dashboards and multi-step approval workflows using RxJS observable streams and asynchronous data handling, delivering real-time business insights to procurement teams.
- Implemented lazy loading and route-based code splitting, reducing initial bundle size and improving application load time by **X%**.
- Adopted NGXS state management to model complex procurement workflows, reducing cross-module coupling and cutting feature delivery time for new modules.

- **Delivered** working increments each sprint in an Agile/Scrum team using Git feature branching, pull requests and peer code reviews.

Ethical Intelligent Technologies

Chennai, India | 02/2022 – 02/2025

Software Engineer

Onboard System — Fleet Management Platform — Angular, RxJS, WebSocket, MQTT

- **Built** a centralized Angular web platform for fleet and asset management supporting **X** organizations and **X** connected vehicles across distributed networks.
- **Implemented** real-time telemetry pipelines over WebSocket and MQTT APIs, maintaining data consistency across large-scale live fleets under continuous load.
- **Developed** reusable RxJS-driven UI components that stream live vehicle and asset updates into operational dashboards, reducing duplicate component code across modules.
- **Improved** dashboard responsiveness and data accuracy for high-volume distributed fleet operations.

Environment Monitoring Platform — Angular, RxJS, WebSocket, MQTT

- **Designed** a real-time Angular monitoring interface for server rooms, laboratories and medical facilities, visualizing live environmental sensor telemetry.
- **Implemented** threshold-based alerting and live data visualization, reducing time-to-detection of environmental anomalies by **X%**.
- **Optimized** Angular change detection and memory usage to sustain continuous 24x7 monitoring on mission-critical systems without performance degradation.
- **Supported** environmental compliance reporting requirements for regulated facilities through reliable, scalable data views.

Refa Rental Platform — Angular 17, Standalone Components

- **Developed** a modern Angular 17 application for residential and commercial rental management using standalone components and reusable shared modules.
- **Implemented** clean, modular routing strategies to support maintainable feature growth and scalable navigation.
- **Designed** the frontend architecture for future extensibility, including multi-language support and embedded analytics.

KEY RESPONSIBILITIES & ACHIEVEMENTS

- **Owned** end-to-end SDLC delivery: requirement analysis, technical design, development, testing support, deployment and production issue resolution.
- **Introduced** AI-assisted development workflows using **Claude Code**, **Model Context Protocol (MCP)** servers and custom agent skills to automate repetitive delivery work — component internationalization, email-template code generation and unit-test scaffolding — reducing manual effort and standardizing output across the team.
- **Standardized** peer code review and Angular best-practice guidelines adopted across project teams, improving code quality and reducing review rework.
- **Integrated** Jenkins CI/CD pipelines for automated builds, tests and deployments, reducing manual release effort by **X%**.
- **Reduced** enterprise dashboard initial load time by **X%** through lazy loading, code splitting and change detection optimization.
- **Designed** scalable modular architectures aligned with Micro Frontend principles.
- **Delivered** responsive, mobile-optimized user interfaces, extending platform accessibility across desktop and mobile devices.
- **Championed** Agile/Scrum ceremonies, improving sprint predictability and team throughput.

EDUCATION

Degree — e.g. B.E. Computer Science Engineering — Institution Name , Tamil Nadu	2014 – 2017 68%
Higher Secondary Certificate (HSC) — School Name , Tamil Nadu	2014 68.3%
Secondary School Leaving Certificate (SSLC) — School Name , Tamil Nadu	2011 91%
